Profile

I am an aspiring developer with a passion for learning new skills. Self motivation comes naturally as I love what I do.

Key strengths:

- Skilled verbal and written communication with experience liaising with both clients and business
- Analytical ability translating business requests into requirements
- Agile experience familiarity with stand ups, refinements, retros, and sprint work.
- Functional and Integration experience
- Self-management and prioritisation
- Highly adaptable with new forms of technology

Skills:

Languages:

- JavaScript ,C# ,HTML, CSS, Xamal

FrontEnd:

- Bootstrap, React

BackEnd:

- Node, Express, ASP.NET core

Others:

- jQuery, MongoBD, D3js, EJS, SQL databases, Unity, UE4

Professional Work:

Web developer (Consultant)

TE WHANGAI TRUST

Oct 2020 - Present

As a Web Developer for Te Whangai Trust I provide analysis on client requests. I am currently developing a new website for the trust where I liaise directly with the business for requirements analysis. I subsequently create a POC through iterative stages until the stakeholder's requirements are fulfilled.

IT administrator

TE WHANGAI TRUST

Jan 2020 - Oct 2020 (FTH)

As an IT administrator for Te Whangai Trust, I would upkeep company systems and softwares. Managing the online inventory was also part of my daily responsibilities, tracking the importing and exporting of products both within the company and to clientele.

Achievements:

- Processed 3months worth of backlogged data to bring the business up to speed reducing bottlenecks.
- Requested to work in multidisciplinary roles due to adaptability.

Developer Intern

DATACOM

July 2019 - Dec 2019 (FTH)

Working on a responsive cloud-based web application utilising [ASP.NET](ASP.NET) core. Data visualisation functionality using JavaScript libraries and integrating this with the main application. Optimising code and working on annotations and documentation for clear communication to future developers.

Achievements:

- Acknowledged by Project Leads for data visualisation work and integrating responsiveness successfully via Bootstrap.
- Selected by team lead to help with Data-comp hackathon project.

Projects:

Covid-19 Summaries web app

Link to site: https://sleepy-gorge-65805.herokuapp.com/

Github Repo: https://github.com/Wahzeem/Covid-19_Summary_app

- Web application that utilises the Covid-19 API, where users can search for countries and have its Corona virus summary statistics displayed. Users will be informed of the total number of confirmed cases, recovered patients, patients in critical condition and the fatalities.

Newsletter subscription app

Link to site: https://agile-wildwood-84913.herokuapp.com/

Github Repo: https://github.com/Wahzeem/Newsletter-Signup

- A sign up page that uses the Mailchimp API to collect subscribers for automated emails. This app is fully functional and will return a welcoming email upon registration.

Academic Background:

Honours in Creative Technology

AUCKLAND UNIVERSITY OF TECHNOLOGY

- Received Colab: Spark Best 3rd year Project Award and Spark VR/AR Award
- Bachelors completed December 2016

Professional Agile Software Developer Certificate

MISSION READY HQ

- Trained in using agile software delivery and design thinking practices
- Exposure to real agile working environments
- Link to Digital certificate:
